Select #: WP2744443

Representative DAN KELLY DYER

iPads are invading the cockpit in a variety of ways. This Saturday seminar will cover some of the uses of the Apple iPad as a electronic flight deck. Pilots are invited to participate by contacting the speaker in advance to describe what application they would like to share with the group. Flight planning, navigation, weather, airport information, and instrument procedures.

Which uses are a good idea, and which can be a distraction? Join us for a lively discussion of the latest in iPad applications and technology.

Directions: Located in the Skyway Building, adjacent to the Hiller Aviation Museum. Parking and entrance behind building. Suite 215 is upstairs in the northwest corner.

A message from the National FAASafety Team Manager

Over 10,150 AMTs earned an AMT Award last year. Will you, this year?
